

# Frontend Developer Assignment

Your task is to copy this UI -

<https://www.figma.com/file/BHViqobFmDbASmkPBhEByd/FrontEnd-Assignment?node-id=0%3A1> with code i.e your page should look exactly like the design. This task is test your UI skills using React/CSS

## The Expected Functions:

- Search box
- Download All
- Generate Slogan
- Write Slogan Number
- Remove Single Slogan with Confirm
- Remove All
- Click to Copy / Copied

## Instructions

- You should use React to do this task.
- use any other UI/CSS library.
- Use the font Galano Grotesque. Font files are provided in this repo.
- For any SVGs/images used in design, you can export it in Figma and copy-paste/download in your code. (To export an asset in Figma, hold Cmd/Ctrl and select the asset. You will get options to export it on the right panel.)
- Use dummy data/json for all the data. No need to make API calls.

## Instructions for submission

- Deploy your code to a website/URL (feel free to use tools like Vercel, Netlify etc. or anything else you prefer).
- Create a public github repository and push your code in it.
- Share both the deployed live link (where we can see your code running) and the github repo link in the email.

## Completing Work

When the work is completed, it is expected that you will transfer this codebase to a git repository and share it with the repository address.

## Questions

If you have any question you can send an e-mail at [technical@buybase.com](mailto:technical@buybase.com)
